

# PAINT MIXING CHART

The different columns show the shade, highlight, and top highlight tones for each color. These are intended to be mixed with the base color you are using to create a subtle progression of tone. For example, when highlighting Thornwood Green, do not use straight Rucksack Tan; just add a little Tan to the Green and highlight with that. Then add a little more and highlight with that, and continue until you have created a subtle progression of color. You can carefully blend each color, or you can just layer them on top of each other.
